

IC2014 Online Platform Coordinator's work

Christian Gärtner

Bruges, April 21st, 2015

IC2014 Online Platform

Key features:

- easy to use
- platform independent: useable regardless of the participant's browser (only standard html, no java-script, ...)
- secure: https, database on a different server, login data is one-way-encrypted, extensive logging, detecting of brute-force-attacks, ...
- real-time: participants can monitor the status of the intercomparison and their Dosimetry System in real-time
- one-stop-shop: all relevant information regarding the IC2014 is available (including documents, copies of the emails sent, ...)
- multilingual: available in different languages (at the moment in English and German, more languages can be added easily)
- reusable: all intercomparison-specific data is stored in a configuration file and so the online platform can be easily used for the next intercomparison

Coordinator's work

Sending, receiving and answering emails:

- 963 incoming emails from participants
- 863 outgoing emails answered manually
- 2,760 outgoing bulk emails (e.g. information, reminders, ...)
- 1,888 emails sent by the online platform (status updates, Forms, ...)
- 6,474 emails in total

Conclusion:

- YES,
 - ... it was a ton of work!
 - ... there were countless hours spent in developing the Online Platform.
 - ... there were many evenings and weekends spent with IC2014's issues.
 - ... challenges and questions emerged that I hadn't expected.

- BUT:
 - ... it was always nice to have contact with the participants.
 - ... it made me proud to see how well the Online Platform was running.
 - ... it was a great experience to be coordinator of an intercomparison.
 - ... and I am looking forward to the next EURADOS intercomparison. 😊

Thank you for your attention!
